

C# Software Developer

Job Description

Virtual Guard specializes in providing high technology security solutions that actually PREVENT crime from taking place, for a fraction of a cost of a real guard. We quickly identify potential threats and intercept them, thus protecting the customer and customer's valuable assets.

Responsibilities

- You will be working on the main Virtual Guard product - a distributed system monitoring over 300 customer sites with more than 3000 IP cameras across US and Canada.
- You will also be working on the next generation Virtual Gate family of products, targeting Automatic Access Control solutions, including Web Apps and Mobile Apps.
- The Virtual Guard technologies are mostly Dot.Net. In addition, there are a few C++ performance-critical components.

Skills

- Dot.NET C# - years 5+
- WinForms

Bonus:

- Dot.NET WebApi
- C++
- Sql
- NoSql
- Rtsp
- Must be able to work well under pressure in a collaborative environment.
- Must be able to communicate newly acquired knowledge to fellow team members.
- Must be able to produce status reports on progress and timelines.
- Competitive salary and benefits package available!
- Please provide a list of recommendations and why you think you will be a good fit for this position.

Looking forward to your application!

Job Type: Full-time
